Serena

remote-controlled honeycomb and roller shades

Experience luxury at an affordable price.

: : LUTRON.

Battery-powered Shades by Lutron
Simple. Affordable. Convenient.

Ultra-quiet Serena® battery-powered shades install wirelessly and can be operated from anywhere in the room using a remote control. These luxury shades—**starting at just $279**—were designed with your lifestyle in mind.

Two design styles
Available in roller or insulating honeycomb shade styles

Easy to install
Shades install and operate without wires

Low maintenance
Batteries last 3-5 years and can be replaced without taking down the shades*

Fashionable aesthetics
Choose from a wide variety of fabric colors and textures

Cordless design
A safe solution for homes with children or pets

NEW Roller shade

Insulating honeycomb shade

Table of Contents

* The batteries will last 3-5 years on a 3'x5' light-filtering shade, assuming the shade moves up and down twice a day, 365 days a year.

Visual appeal

Block the sun in style. Press one button
and shades move in perfect unison, staying
aligned across adjacent windows — giving your
home a unified look both inside and out.

Roller shades

Styles and fabrics

Choose from three light-filtering options, for just the right amount of sunlight in your space.

Sheer

- Open weaves preserve views to outside and filter sunlight
- Ideal for rooms where you don't need complete privacy
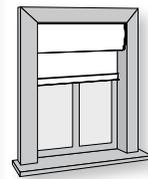

Translucent

- Tighter weaves transform harsh daylight into a soft, filtered glow
- Provides increased privacy for spaces like bathrooms

Blackout

- Opaque fabrics block light from entering the space
- Ideal for bedrooms and media rooms for complete privacy

Top treatment options

Roller shade with fascia—
for a complete, finished look

- Fabric-wrapped fascia matches the roller shade fabric

Roller shade without fascia—
for windows that will use a separate, custom top treatment

- Versatile design that works with cornices, swags, drapery, or valances

Fabric collections

Serena® roller shades are available in over 75 fabrics, including cool hues and bold colors that pop.

Palette (blackout and translucent) a wide array of colors ranging from nature-inspired hues to vibrant bolds (blackout fabrics are the same color on both sides)

Sheerlite 3 and Sheerlite 5 (sheer) solar screen fabrics with two-toned color weaves

Hue (blackout) a timeless color palette with classic neutrals and standard bolds (fabric is dual-sided with a white backing)

Monomer (sheer) delicate linens in warm neutrals

Bistre (sheer) textured linens in simple, classic tones

Format (sheer) smooth fabrics in colors that range from sophisticated whites to deep neutrals

Tint (translucent) soft neutrals and muted bolds with a textured sheen

**Ream** (translucent) a warm selection of bolds with a subtle shimmer

Loom (translucent) woven, natural fibers in warm earth tones

Check out our wide range of colors at **www.lutron.com/Serena** or download the **Lutron Fabric Collections app** on the App Store.
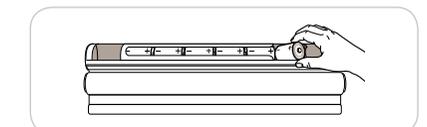

Note: Light transmittance can affect color appearance of sheer and translucent fabrics.

Easy maintenance

- Innovative headrail simply tips forward to reveal the battery tray— without taking the shade down

Tip down the headrail.

Change the batteries and tip headrail back into place.

* Matching cordless manual shade options are also available.

Honeycomb shades

Styles and fabrics

When selecting a shade fabric, you don't need to sacrifice fashion for function. Whether you want to cut glare, add insulation, or block sunlight, you can choose from a beautiful palette of colors and textures that will meet those needs, all while adding a signature look to every space.

Light-filtering – Single-cell
· Transforms harsh daylight into a soft, filtered glow
· Provides varying levels of privacy from the outside
· Saves energy with insulating fabric and design

Light-filtering – Double-cell
· Allows some light to filter into the space
· Saves even more energy with double-cell insulating design

Room-darkening – Single-cell
· Blocks light from entering into a space
· Creates complete privacy from the outside
· Saves the most energy due to aluminum lining

Fabric collections
Serena® honeycomb shades are available in a variety of opacities and colors.

Cyprus (light-filtering or room-darkening) traditional neutrals

Monaco (light-filtering or room-darkening) warm tints in spun lace

Rio (light-filtering or room-darkening) a variety of colors from whites and tans to bold hues that pop

Sedona (light-filtering) airy sheers in a natural palette

**Prague** (light-filtering) earth tones paired with woven linen

Napa (light-filtering) textured, soft neutral tones and rich browns

Check out our wide range of colors at **www.lutron.com/Serena** or download the **Lutron Fabric Collections app** on the App Store.
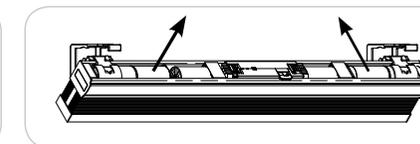

Note: Light transmittance can affect color appearance of light-filtering fabrics.
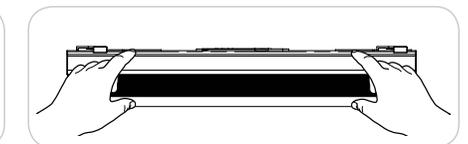

Easy maintenance
Our exclusive Tap n' Tilt™ technology makes changing the batteries a breeze, without ever removing the shades.

Simply press the release buttons, allowing the headrail to tilt forward.

Change the batteries.

Snap the headrail back into place.

* Matching cordless manual shade options are also available.
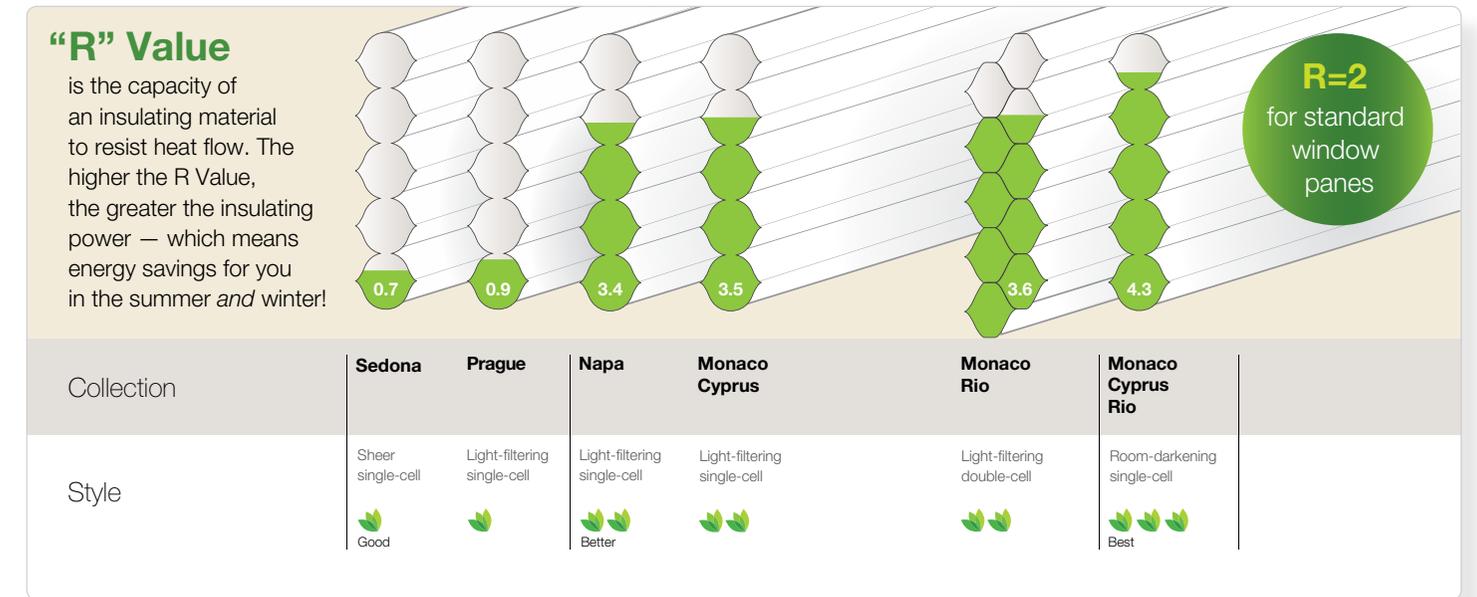

Serena® honeycomb shades

Effortless energy savings

Lowering shades in the summer prevents the sun's rays from heating up a room, while raising them in the winter captures heat from those rays, helping you save energy and money.
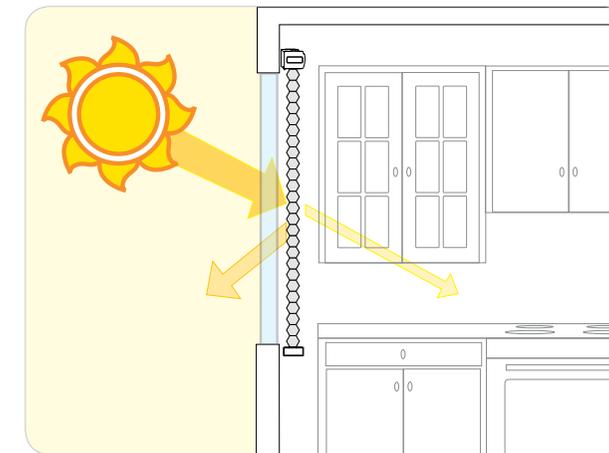

Serena honeycomb shades capitalize on that energy savings. In fact, they can double the insulation of your windows.

Serena honeycomb shades have pockets that trap air, providing superior insulation when lowered. They come in a variety of styles, and as you can see from the following chart, deliver varying R values depending on the style.
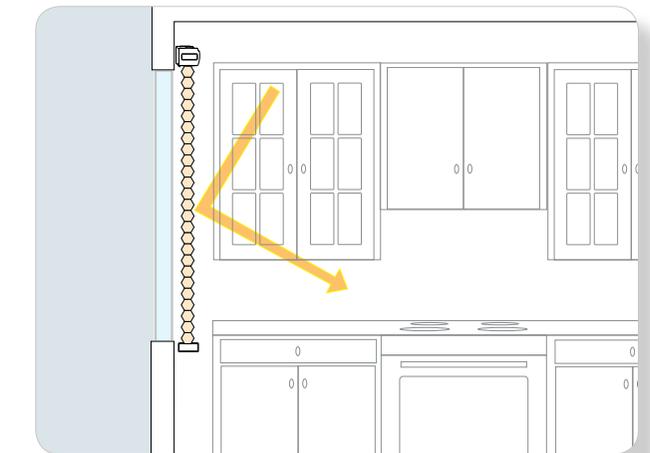

Honeycomb shades

"R" Value is the capacity of an insulating material to resist heat flow. The higher the R Value, the greater the insulating power — which means energy savings for you in the summer *and* winter!

0.7   0.9   3.4   3.5   3.6   4.3

R=2 for standard window panes

Collection	Sedona	Prague	Napa	Monaco Cyprus	Monaco Rio	Monaco Cyprus Rio
Style	Sheer single-cell	Light-filtering single-cell	Light-filtering single-cell	Light-filtering single-cell	Light-filtering double-cell	Room-darkening single-cell
	Good		Better			Best

Summer energy savings

Reflect summer sun and keep inside air cooler

**Winter energy savings**

Prevent heat loss in winter, keeping inside air warmer
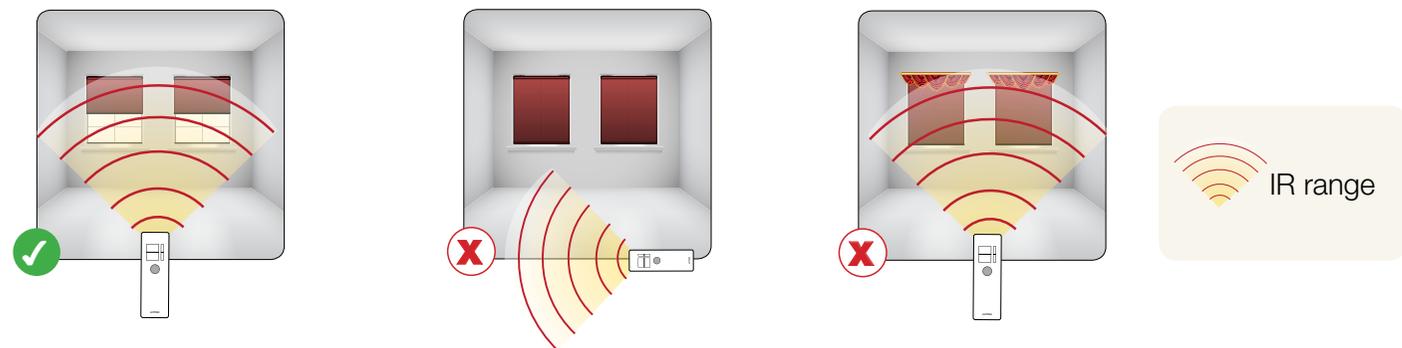

Control by pointing directly at your shade

Infrared (IR) remote control

IR remotes send a signal via line-of-sight, meaning you have to point the remote control at the specific shade you wish to control. IR remotes are less expensive than RF and are excellent for a TV room because they are compatible with many universal remote controls.

You can choose from a single-group control or a 4-group control. Designed for use with honeycomb shades only, if you are purchasing a roller shade, please choose from the RF controls on the next page.

NOTE: We don't recommend IR shades for a window with top treatments.

IR remote basics

IR range

An IR remote control needs to be able to "see" the shade(s) that it's controlling and has to be pointing in the direction of the shade(s). IR signals can't travel through obstructions, so an IR remote isn't ideal if you're planning on putting a curtain or other type of window treatment in front of your shade.

Single-group IR remote control

This option allows you to control a single shade or multiple shades with one button press.

This control is only available as a hand-held device and can't be wall-mounted or placed on a pedestal.

4-group IR remote control

This remote has four buttons. Each button can be programmed to a single shade or to a select group of shades that you want to control at the same time.

This control is only available as a hand-held device and can't be wall mounted or placed on a pedestal.
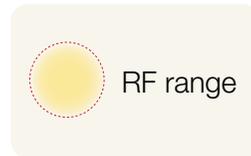

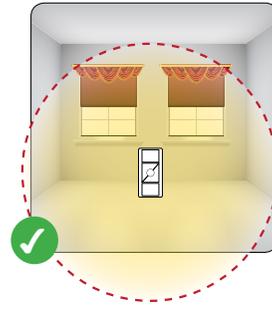

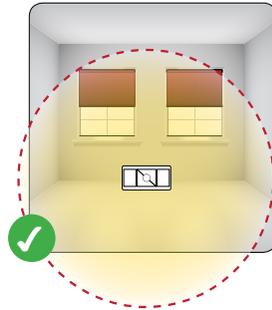

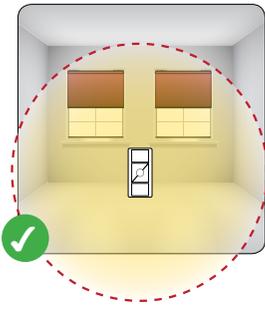

Control from anywhere in the room

Radio frequency (RF) remote control

An RF wireless control operates via radio frequency, allowing flexible control of your shades from anywhere in the room. This remote is ideal for use with shades installed behind a drapery, a valance, or a cornice because the remote's signal doesn't require line-of-sight to the shade for it to operate flawlessly.

You can choose from a single-group Pico® wireless control or a 4-group control.

RF remote basics

RF range

An RF remote control doesn't need to "see" the shade(s) it's controlling. So you can hold it in your hand, keep it on your table in a pedestal, or even mount it to a wall using an optional faceplate adapter and faceplate. RF signals can travel through anything that isn't metal and will control all shades within a 30 foot range.

Single-group RF remote control

This option allows you to control a single shade or multiple shades with one button press.

You can:
• use the Pico® as a hand-held device
• mount it wirelessly to a wall
• place it on a tabletop pedestal

Pico wireless control with a tabletop dual pedestal

Pico wireless control with a tabletop pedestal

Hand-held Pico wireless control

Pico wireless control with a Claro® wallplate

4-group RF remote control

This remote has four buttons. Each button can be programmed to a single shade or to a select group of shades that you want to control at the same time.

This control is only available as a hand-held device and can't be wall-mounted or placed on a pedestal.

See how easy it is to:

- Measure for Serena® shades
- Choose the control that's best for you
- Install the shades
- Program the control
- Change the batteries
