**Residence:** _____ **Room:** _____ **Window(s):** _____

Important: If you plan on installing the shade in a place where you need to raise the entire shade above an obstacle (such as above doors that open), please refer to our stacking guidelines (P/N 368-2573) or contact customer service to determine how high to mount your shade.
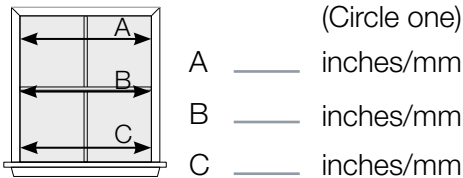

| **Step 1**	**Option A:** Inside Mount Measurements

Inside Mount Measurements
- Depth of window must be at least 1½" (38 mm) to use inside mounting option.
- Do not make any deductions from the width! Lutron will deduct ⅛" (3 mm) per side on inside mounted shades to allow room for proper operation.
- Lutron will make NO additions or deductions to the height measurement.

Width:

(Circle one)

A _____ inches/mm

B _____ inches/mm

C _____ inches/mm

Order width: _____ inches/mm

(**Smallest** of the three measurements)

Height:

(Circle one)

D _____ inches/mm

E _____ inches/mm

F _____ inches/mm

Order height: _____ inches/mm

(**Largest** of the three measurements)

Step 1	**Option B:** Outside Mount On Trim Measurements

Width: The width of your shades is up to you. For example, if you'd like to completely cover the window, measure from edge to edge of the frame.
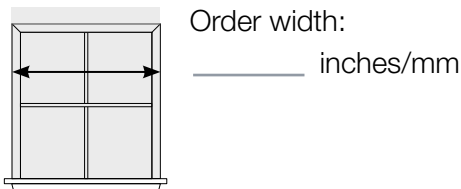

Order width:

_____ inches/mm
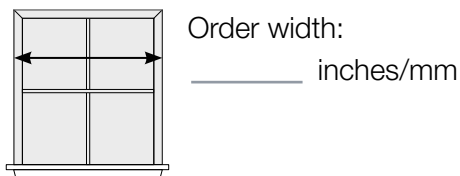

Height: Measure from the top of the trim to the windowsill.

Order height:

_____ inches/mm

Side view
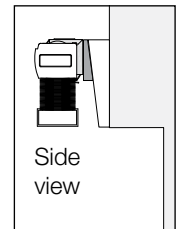

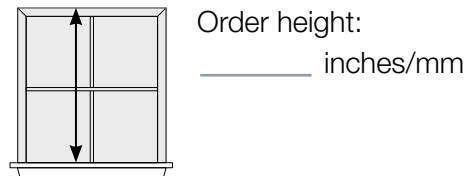

Step 1	**Option C:** Outside Mount Above Trim Measurements

Width: The width of your shades is up to you. For example, if you'd like to completely cover the window, measure from edge to edge of the frame.

Height: Determine where you're going to mount the shade. Then measure from where the top of the headrail would fall, down to the windowsill.

Note: The motorized bracket is 2⅝" (67 mm) high, however, it is recommended to allow for at least 3⅛" (80 mm) of space above the top edge of the window trim (manual shade brackets require you to allow for 1⅝" (42 mm)).

Order width:

_____ inches/mm

Order height:

_____ inches/mm

Step 2	Select Pleat Style and Fabric

Single-cell Light-filtering

☐ Point-bonded*
☐ Spun Lace**
　☐ Vinyl
　☐ Aluminum
☐ Crush
☐ Woven

Double-cell Light-filtering

☐ Spun Lace
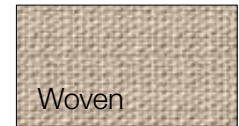

Single-cell Sheer

☐ Sheer**
　☐ Vinyl
　☐ Aluminum

**Single-cell Room-darkening**

☐ Point-bonded*
☐ Spun Lace**
　☐ Vinyl
　☐ Aluminum

* Available in fire rated fabrics.
** Most fabrics come standard with either a vinyl or aluminum headrail.
　However, certain fabrics allow a choice in headrail material.

Point-bonded | Spun Lace | Sheer | Crush | Woven

Fabric Color: _____ (see www.serenashades.com)

Fabric P/N: _____ (see www.lutron.com/honeycombfabrics or serena shade fabric binder)

Step 4	Select Power Options

☐ Batteries　　☐ Plug-in　　☐ Manual

Step 5	Select Stand Alone Control

☐ RF Control
(PJ-3BRL-G**XX**-T02)*

☐ Single group IR
(SVIT-CS-WH)

☐ 4-group IR
(SVIT-CSGC-WH)

☐ Not required
(previously purchased)

* Select color of RF Control:

☐ White (WH)　　☐ White/Grey (WG)　　☐ Ivory (IV)　　☐ Light Almond (LA)　　☐ Black (BL)
