## Stack Guide

## Serena. Remote Controlled Shades

Use these stacking guidelines if you plan on installing your Serena shade in a place where you need to raise the entire shade above an obstacle (such as above doors that open). These guidelines will help you determine how high to mount your shade, so that the shade will clear the obstacle when it's fully raised.

A = Stack height: the total height of the fully raised shade from the top of the bracket to the bottom of the bottom rail
$\mathbf{B}=15 / 8 \mathrm{in} .(42 \mathrm{~mm})-$ headrail height
C $=5 / 8 \mathrm{in}$. $(16 \mathrm{~mm})-$ bottom rail height
$\mathbf{D}=25 / 8$ in. $(67 \mathrm{~mm})-$ bracket height

## Dimensions for A
